

## ET: Legacy Development - Feature #1049

Feature # 888 (New): Improvements of server browser

### Better favourites display

21.07.2017 15:09 - artium

<b>Status:</b> New	<b>% Done:</b> 0%
<b>Priority:</b> Normal	<b>Spent time:</b> 0.00 hour
<b>Assignee:</b>	
<b>Category:</b> Mod UI	
<b>Target version:</b> 2.78	
<b>OS:</b>	<b>Arch:</b>
<b>Description</b> Show a list of all favorites unconditionally.  Currently, one need to refresh whole server list just to be able to do a GUI equivalent of "/connect my.fav.server.com".  If the favorite server is down, or if the master server list is down, the favourite is shown.	

### History

#### #1 - 21.07.2017 15:09 - artium

- the favourite is **not** shown.

#### #2 - 22.07.2017 10:13 - Spyhawk

- Category set to Mod UI

- Target version set to 2.78

#### #3 - 22.07.2017 19:37 - IR4T4

The favourites did work for me when the master was down.

We may enable the filter automatically when there are no online servers found. Is that what you want?

We may enable the filter automatically when there are no online servers found. Is that what you want?

Can you reproduce the following scenario?

Precondition: You have at least one favourite server.

1. Start etl and click "Play Online" in order to bring server selection screen.
2. In the filter area, set "Sources" to "Favorites". You will see at least one server in the list.
3. Exit the game.
4. Start game again and go to the "Play Online" menu. You will see that the filter is set to "Favorites" and there are no servers in the list.
5. Cycle the "Sources" filter until "Internet" is selected. The servers will start filling the list. Wait a moment until you favourite server appear in the list.
6. Cycle again the filter to "Favorites", you will see your favorite server there.

Based on this behaviour I guessed that behind the scenes the "Favorites" filter is actually filtering the list of servers received from the master. I might be wrong here.
