<b>Description</b>	
Ray: crashed	
Error message: "Illegible Server message 69"	

### History

#### #1 - 24.12.2018 00:58 - IR4T4

@Ray how did you connect? From another mod, from server browser, +connect etlegacy.com ?

#### #2 - 24.12.2018 09:12 - Ray

@IR4T4

I connected thru console: /connect etlegacy.com

#### #3 - 31.12.2018 16:53 - Spyhawk

- Priority changed from Urgent to Low

- Target version changed from 2.76 to 2.78

This seems to happen very rarely. We'll need more feedback or a way to reproduce. At first sight, this looks like some packets were lost on the way.

#### #4 - 06.01.2019 09:17 - IR4T4

- Target version changed from 2.78 to 2.77

#### #5 - 24.01.2019 14:17 - IR4T4

- Target version changed from 2.77 to 2.78

#### #6 - 05.03.2019 17:19 - keMoN

- Priority changed from Low to High

- Target version changed from 2.78 to 2.77

Copy-paste from a friendly server admin:

"Any idea what would cause a constant stream of "WARNING: bad command byte for client 4" errors in the server console to the point where the clients cannot move and is lagged out, then they get disconnected with the message "cl\_parseservermessage: Illegible server message 224", if they try to reconnect immediately they get kicked and a temp ban.

We had this yesterday for lots of clients, I thought it was because we had exceeded the amount of maps as we had uploaded new maps prior to this, once I deleted some maps the issue did not happen again all night but it has begun again today."

**#7 - 06.03.2019 18:18 - keMoN**

Kimi|AHK said in TM Discord that they received this error while playing with a vanilla ET client.

**#8 - 06.03.2019 23:41 - kimi**

ye after that i switch to legacy client and didnt have problem

**#9 - 08.07.2019 12:33 - Spyhawk**

- Target version changed from 2.77 to 2.78
