Category: Mod UI	
Target version: 2.78	
OS:	Arch:
Description It would be nice to have: 1. A possibility to blacklist a server, so it does not appear in the main list of online servers (just like there's an option to add a server to favourites). 2. Two additional tabs in server browser: - Blacklisted servers - strictly related to the 1st point, players should be able to manage blacklisted servers, - Recently visited servers - a list of servers that the player visited in the past. These two ideas came to my mind after a round in Counter Strike where the server browser is really functional (besides the '90s appearance).	
Subtasks:	
Feature # 1050: Allow filtering server by name	Invalid
Feature # 1044: Servername search-bar in the server browser	New
Feature # 1049: Better favourites display	New
